Specifications

Model 1212E

1212E is a slicer with an automatic variable stroke carriage which can be adjusted according to the piece to slice. In this way it is possible to cut 70 slices a minute of a 4" salami or to cut 45 slices a minute of a 8" product. It is possible to change from manual to automatic cutting even when the slicer is working. Auto carriage always stops in home loading position, for easy loading of product.
